SUMMERTIME IS EQUINE TIME

Since May our therapeutic riding and equine assisted activities program has been steadily growing with 55% of our residents and day program participants enrolled in the program. A number of the riders have made great strides, reached significant milestones of success, and looked forward to each week's lesson with much excitement and smiles.

We were able to add community riders in June, ranging in age from 6 to 26 years of age. These special riders enjoy their early evening lessons and our horses, Lucky, Merle, and Poco, seem to love having new friends in the barn. Additionally, we have some great equine volunteers from high school to college age and area friends passionate about horses and service to others.

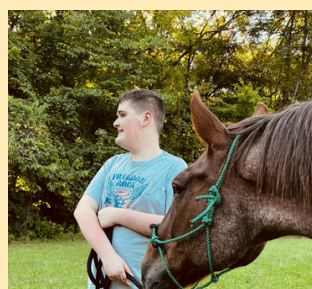

We are still accepting community rider and volunteer applications, go to www.safehavenfarms.org/equestrian to download and complete the necessary documents - send to janie.cochran@safehavenfarms.org.

THANK YOU MOOSE LODGE!

The Moose Lodge 501 of Middletown hosted a special fundraiser to support the therapeutic riding program at Safe Haven Farms. Lodge members raised \$2,000 to assist in the purchase of a youth size saddle for our youngest community riders and other much needed equine supplies. What a great feeling to have such devoted support from a local group who sincerely cares about our mission to serve children and adults with developmental disabilities.

Thank you
4imprint
One by One
for donating these
adorable cinch
bags to give to our
equestrian
students.

Safe Haven Farms

A community of choice for adults with autism and other developmental disabilities offering residential, day and therapeutic equestrian programs in a farm setting.

We work to improve the lives of individuals with developmental disabilities. Autism and other developmental disabilities affect each individual differently. As children with developmental disabilities age out of the school system, a few lucky ones become largely independent. Many require some level of ongoing supports. Just like everyone else, these individuals desire to be happy, to be free from suffering, and to know peace and joy. Many find farm life helpful in meeting those desires.
